Marine Theft Prevention & Asset Protection

MODEL C300

"FEATURES ONLY OFFERED BY AMBUSH"

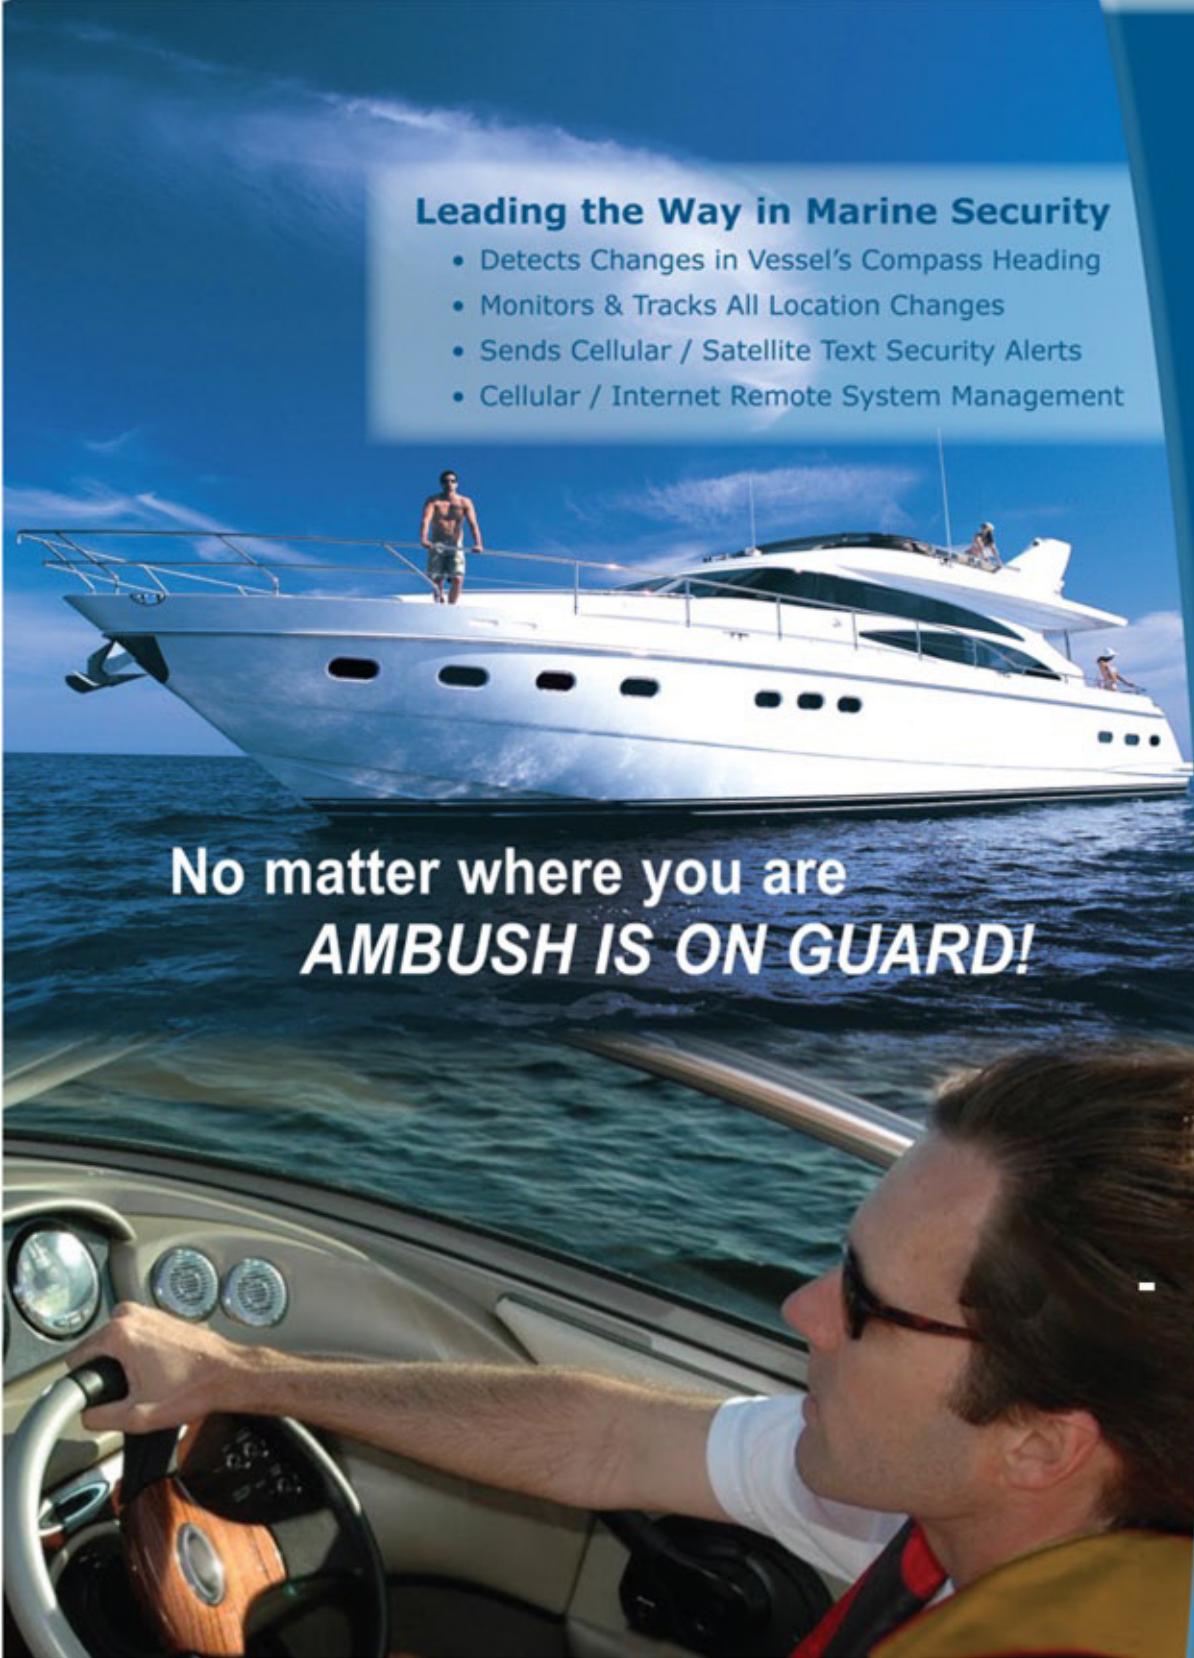

Patented compasSAFE™ technology sets a reference point when activated that instantly triggers an alarm for any changes in heading angle or lineal movement:

- Activates your vessel's alarm horn and lights*
- Disables vessel by turning off engine electrical ignition*
- Sends up to ten e-mails/text messages when breached
- Live map shows vessel's longitude, latitude & heading

EASY BASIC INSTALLATION

AMBUSH is easily mounted in horizontal or vertical position and connected to your vessel's 12 volt power supply. Marine weatherproof system features integrated cellular antenna and includes a GPS antenna mounted in an out-of-sight vessel location. Manage system via most cellular phones or personal computers, including activation, deactivation, setup and alert report messages. Most setup system configurations are automatic.

Leading the Way in Marine Security

- Detects Changes in Vessel's Compass Heading
- Monitors & Tracks All Location Changes
- Sends Cellular / Satellite Text Security Alerts
- Cellular / Internet Remote System Management

No matter where you are
AMBUSH IS ON GUARD!

INSURANCE DISCOUNT INCENTIVES

Owning an AMBUSH theft prevention and security system offers many advantages while also saving you money. Informing your vessel's insurance provider you have installed the AMBUSH can save you money on your policy premium. Insurers routinely give vessels equipped with a monitored alarm system a substantial discount. Check with your insurance agent to see if your vessel qualifies.

Patented compassSAFE™ Technology

AMBUSH Theft Prevention and Security offers you peace-of-mind knowing your vessel has a 24/7 "live guard" protecting your investment.

AMBUSH triggers an audible and/or visual alarm and notifies you when it detects any changes in either your vessel's docked compass heading or GPS position (user presets). The basic system automatically sends text messages and/or email alert notifications to the persons you designate.

It sends your vessel's exact position and alarm status. AMBUSH will continue sending status updates at selected intervals until system is deactivated by the owner.

CONCEALED INSTALLATION

Compact design permits the entire AMBUSH system to be easily installed and hidden from view; would-be thieves will not detect it. AMBUSH is wireless and has a unique anti-jamming warning feature that sets it apart. System includes power cable, GPS and cellular antenna, and installation/user guide.

Live mapTRACKER displays your precise boat movement from the departure to final destination.

Live mapTRACKER displays your boat exact location.

Ambush display on standard boat electronics

LIVE mapTRACKER™ Track and search your boat's location and easily chart longitude, latitude and heading over any selectable period of time from any computer. User selectable report options include notification interval (every 1, 3, 5 or 10 minutes) and report display by any date range.

STANDARD FEATURES

Internet and cellular remote management; Programmable compass heading and perimeter lock; Status report; User preset contacts for alert reports; Low battery alert messages; Unit temperature display. On board video display capabilities.

UNIQUE FEATURES

Compass driven technology; Wireless communication signal; Anti-jamming warning system; Sturdy marine weather-proof unit construction. Compact, easily hidden unit and antennas.

SYSTEM OPTIONS

High-water level detection, Open/Close circuits intrusion detection; Back-up battery protection; Professional 24/7 alarm monitoring service; Two-way seamless satellite communication; Map Tracking; Electronic equipment theft detection.
